

Quarry owner and leading supplier
and exporter of various types of
first-quality stone

Elina

International Group

Our extensive experience in extracting blocks from quarries, in selection, measuring, design, precision cutting and polishing, as well as in transportation, combined with a wide variety of types and models of the finest marbles, granites, onyx and travertines, has made us a top choice for homeowners and commercial installation owners, as well as for property developers, importers and wholesalers.

WHY ELINA INTERNATIONAL:

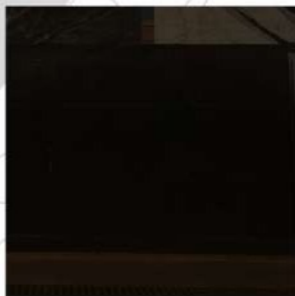

- 1) Direct access to the quarry: Ensures stable supply and quality.
- 2) Global shipments: Effective logistics support for timely delivery of products.
- 3) Competitive prices: Value without compromising quality.
- 4) Knowledge of international trade
- 5) Management and staff who speak various languages, such as English, Spanish, Italian, Greek and Persian

We Deliver What We Promise

Marble is a metamorphic rock composed of more than 50% carbonate minerals (calcite and/or aragonite and/or dolomite). The word "marble" comes from the ancient Greek word marmaron or marmaros, meaning "shining stone," which in turn derives from the verb marmairo, meaning "to gleam, to sparkle."
